TECHNICAL EXPERIENCE

Rupiya - Smart Agriculture Platform

Tech: JavaScript, HTML/CSS, REST APIs, Data Analytics, Weather APIs

Engineered a comprehensive AgTech web application featuring real-time weather forecasting, intelligent fertilizer recommendations, and interactive product scanning capabilities. Designed an accessible, rural-friendly dashboard to empower farmers with actionable insights, improving crop yield planning.

E-Learning Path Platform

Tech: HTML5, CSS3, JavaScript

Developed a comprehensive education portal that guides users through structured learning paths for modern web technologies. Engineered separate workflows for React, Python, JavaScript, CSS, and Data Structures, complete with interactive assignments and integrated progress tracking.

VahanSetu - The OS for Indian EV Mobility

Tech: Python, Flask, SQLite, React 18, Vite, Chart.js

Engineered an enterprise-grade EV fleet ecosystem, integrating real-time telemetry, OSRM-based predictive routing, and dynamic pricing models to optimize charging infrastructure. Designed a highly responsive data visualization dashboard using React and Chart.js to monitor active charging nodes.

GitHub Portfolio Analyzer

Tech: React.js, Node.js, Express, MongoDB, GitHub API, Chart.js

Created a recruiter-focused analytics platform using the GitHub API, transforming raw repository contribution patterns into actionable hiring insights and developer scorecards. Implemented robust RESTful APIs with Node.js and Express to seamlessly fetch, parse, and cache complex user data.

Frontend & UI/UX Projects

Frontend Architecture: Developed 10+ frontend architectures (including Netflix, YouTube, and BookMyShow clones) to master responsive design and complex UI/UX implementation.
