EDUCATION

- Swaminarayan University, Kalol – B.Tech (2025-2029)
- Khyati World School, Ahmedabad – Higher Sec. (2023-2025)
- Metas Adventist School, Vyara – Secondary (2021-2023)

SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), C++, React.js, HTML, CSS, Tailwind
- **Databases & Backend:** MongoDB, REST APIs, Cloudinary, Node.js, Express.js
- **Tools & Platforms:** Git, GitHub, Postman, npm, Vercel, Netlify, Render, Figma, Hostinger
- **UI/UX Design:** Figma, Wireframing, Prototyping

CERTIFICATES

- Runner-Up (out of 50+ teams)**
Odoo x Adani Univ Hackathon '26
- Finalist (Top 10 Teams)**
InnovAltion - Shaping Future Innovators
- Hackatron Finalist**
Hack Innovate 2026 - AI for Vision
- Top Achiever**
CodeMatrix: Genesis Hackathon
- Certified Specialist**
GitHub Copilot Fundamentals

HACKATHON

- 1. Hackathon Finalist – REPO REBOOT'25**
Team leader of 4 developers; architected a full-stack deployment pipeline during a 48-hour sprint, demonstrating advanced technical problem-solving and rapid prototyping skills.
[Certificate](#) | [Github](#) | [Portfolio](#)
- 2. Hack Innovate 2026 - AI for Vision**
Hackatron finalist out of 200+ participants; contributed as a core technical member to engineer precision AI solutions and integrate real-time analytics models.
[Certificate](#) | [Github](#) | [Portfolio](#)
- 3. InnovAltion - Shaping Future Innovators**
Team leader of Innovators Prime at DA-IICT; directed a 4-person engineering team to build and deploy an innovative predictive modeling application.
[Certificate](#)

PROJECTS

- AIDTM Hackathon - AI Logistics Routing**
Tech: Python, Node.js, Express, MongoDB, AI/ML, Maps API
Architected an AI-powered logistics routing engine, integrating ML algorithms with Google Maps API to optimize delivery routes and reduce simulated global supply chain costs. Developed a real-time dashboard for fleet tracking, significantly improving last-mile delivery efficiency.
- Smart Expense Management System**
Tech: Tailwind CSS, Node.js, Express, MongoDB, JWT, Tesseract.js
Developed a full-stack expense web app, automating reimbursement workflows, enforcing Role-Based Access Control (RBAC), and utilizing OCR for automated multi-currency receipt extraction. Engineered a secure multi-level approval system that streamlined organizational tracking and reduced manual processing time.
- Adaptive Learning Platform**
Tech: Tailwind CSS, Node.js, Express, MongoDB, Face Recognition API
Built an AI-driven educational platform, dynamically personalizing curriculum paths based on real-time engagement tracking and emotion-sensing performance metrics. Optimized MongoDB aggregations to rapidly process and analyze continuous streams of student data with zero downtime.
- VahanSetu - The OS for Indian EV Mobility**
Tech: Python, Flask, SQLite, React 18, Vite, Chart.js
Engineered an enterprise-grade EV fleet ecosystem, integrating real-time telemetry, OSRM-based predictive routing, and dynamic pricing models to optimize charging infrastructure. Designed a highly responsive data visualization dashboard using React and Chart.js to monitor active charging nodes.
- GitHub Portfolio Analyzer**
Tech: React.js, Node.js, Express, MongoDB, GitHub API, Chart.js
Created a recruiter-focused analytics platform using the GitHub API, transforming raw repository contribution patterns into actionable hiring insights and developer scorecards. Implemented robust RESTful APIs with Node.js and Express to seamlessly fetch, parse, and cache complex user data.

Frontend & UI/UX Projects

Frontend Architecture: Developed 10+ frontend architectures (including Netflix, YouTube, and BookMyShow clones) to master responsive design and complex UI/UX implementation.
