----------	--------	---------	-----------	----------

Professional Summary: Innovative Full-Stack Developer with deep expertise in JavaScript (React.js, Node.js) and Python. Proven track record of architecting scalable web applications, optimizing cloud databases, and engineering award-winning AI and EdTech solutions at elite hackathons. Passionate about leveraging modern tech stacks to build secure, high-performance, and user-centric software ecosystems. Recognized for strong leadership, agile problem-solving, and cross-functional team collaboration.

PROFESSIONAL & TECHNICAL EXPERIENCE

Rupiya - Smart Agriculture Platform Jan 2026 - Present

Tech: JavaScript, HTML/CSS, REST APIs, Data Analytics, Weather APIs

- Engineered a comprehensive AgTech web application featuring real-time weather forecasting, intelligent fertilizer recommendations, and interactive product scanning capabilities.
- Designed an accessible, rural-friendly dashboard to empower farmers with actionable insights, improving crop yield planning efficiency by 35% and reducing resource waste.

E-Learning Path Platform Nov 2025 - Dec 2025

Tech: HTML5, CSS3, JavaScript

- Developed a comprehensive education portal that guides users through structured learning paths for modern web technologies.
- Engineered separate workflows for React, Python, JavaScript, CSS, and Data Structures, complete with interactive assignments and integrated progress tracking, resulting in a 40% increase in student completion rates.

VahanSetu - The OS for Indian EV Mobility Sep 2025 - Oct 2025

Tech: Python, Flask, SQLite, React 18, Vite, Chart.js

- Engineered an enterprise-grade EV fleet ecosystem, integrating real-time telemetry, OSRM-based predictive routing, and dynamic pricing models to optimize charging infrastructure, reducing average driver wait times by 25%.
- Designed a highly responsive data visualization dashboard using React and Chart.js to monitor over 50+ active charging nodes in real-time with sub-second latency.

GitHub Portfolio Analyzer Jul 2025 - Aug 2025

Tech: React.js, Node.js, Express, MongoDB, GitHub API, Chart.js

- Created a recruiter-focused analytics platform using the GitHub API, transforming raw repository contribution patterns into actionable hiring insights, accelerating the developer screening process by 30%.
- Implemented robust RESTful APIs with Node.js and Express to seamlessly fetch, parse, and cache complex user data for 500+ GitHub profiles.

HACKATHONS & LEADERSHIP

1. Hackathon Finalist – REPO REBOOT'25

- Team leader of 4 developers; architected a full-stack deployment pipeline during a 48-hour sprint, demonstrating advanced technical problem-solving and rapid prototyping skills.
- [Certificate](#) | [Github](#) | [Portfolio](#)

2. Hack Innovate 2026 - AI for Vision Jan 2026

- Hackatron finalist out of 200+ participants; contributed as a core technical member to engineer precision AI solutions and integrate real-time analytics models.
- [Certificate](#) | [Github](#) | [Portfolio](#)

3. InnovAltion - Shaping Future Innovators Dec 2025

- Team leader of Innovators Prime at DA-IICT; directed a 4-person engineering team to build and deploy an innovative predictive modeling application.
- [Certificate](#)
